Re: Piedmont Triad International Airport

PO Box 35005

Greensboro, NC 27425

Dear Mr. Salley;

On March 25, 1991 we removed one 10,000 gallon tank from the Piedmont Triad International Airport. The tank was at the old Blue Bell/Wrangler hanger that has recently been demolished for new construction. The last contents were gas, on the 30 day notice we reported the last contents as jet fuel.

The tank measured 27 feet by 8 feet and was buried 3 feet below surface grade. Three soil samples were taken beneath the tank, two feet below tank grade at a depth of 13 feet. The samples were collected from the floor of the hole with the bucket of our backhoe. The samples were stored in an ice cooler until they were delivered to the lab.

Attached is the soil report dated March 29, 1991, the chain of custody for the soil samples, the base map, and the site map. The tank was taken to Safeway Tank Disposal in Colfax for disposal. We recommend, based on the attached soil report, that this site be closed. The airport plans to build a new hanger over this site and the grading is scheduled to start within several weeks.

If I can help with any further information, please let me know.

Sincerely,

Thad Chesson

cc: Chris Colenda Terry Cole

Edward Rich, Sr.
